Brief Description of Capabilities - Technical Capability:

GeoLogics is a 15-year old high-technology company with over 700 engineers and over 10 years of successful cooperation in development programs with the U.S. Navy.

GeoLogics has supported numerous aircraft platforms (E-2C, P-3, F-14, and F-18), shipboard, and sensor programs for NRL, NAWCAD, NAVSEA, and SPAWAR. We participated in SSA and IPT programs for the Navy, and work under similar arrangements with other clients.

Our experience can help ensure the Navy Virtual SYSCOM (VS) Commanders of NAVAIR, NAVSEA, NAVSUP and SPAWAR that GeoLogics has the breadth of talent needed to meet any future challenges in these and related types of programs.

GeoLogics has a history of successful execution of engineering, operations, and information systems support services ranging from real-time high-fidelity simulations of space systems and structures to the applications of the latest embedded controllers in military systems. As an experienced prime contractor, subcontractor, and contract labor supplier, we have the capability to rapidly staff and successfully perform all task order work required by our many clients in diverse geographical locations.

Besides our corporate headquarters located in the northern Virginia high-technology corridor, GeoLogics maintains field operations in Boston, MA; Charleston, SC; Houston and Austin, TX; Los Angeles, Long Beach, and El Segundo, CA; Denver, CO, Lexington Park, MD; Norfolk, VA; and Landstuhl, Germany. From those offices, our professional staff of 700 engineers supports clients worldwide.

Past Performance (Service experience for the last 3 years) -

Contract/TO Number	Prime or Sub	Ordering Activity/ Program /Customer	Award Date / Completion Date	Performance Zones	Seaport-e Functional Area(s)	Mission Area For Which Function Was Performed	Gov't POC(Phone Number)
Within the last three years, under BeaconGOV's Prime Seaport-e Contract, Geologics did not have any task orders as a subcontractor.	Sub	N/A	N/A	N/A	N/A	N/A	N/A
